- A good understanding of UI/UX best practices.

EDUCATION

Federal University of Technology,

Imo, Owerri— *Bachelor of Science (B.S) Computer Science*

January 2016 - 2021

GPA: 3.2

Relevant Coursework: Internet Technology, Principles of Information and Data management, Numerical Analysis, Software Methodology

PROJECTS

Word Beater— *JSON, JAVASCRIPT, BOOTSTRAP, HTML*

Word Beater is a speed typing web app created using various languages. I made use of javascript more in this project. I basically pulled several words from a local array of text and projected them onto the UI, I also added a timer that indicates how long you have to type in any particular word.

Expense Tracker— *REACT JS - REACT HOOKS, JAVASCRIPT, CSS, GIT, HTML*

This is an expense tracker web-app built with react js as the foundation alongside a few other web development technologies. You could use this app to keep track and calculate all of your expenses.

Portfolio Website— *JAVASCRIPT, BOOTSTRAP, HTML, CSS, GIT, SCSS*

This is my personal portfolio website that showcases my skills, how you can contact me, and also an about me section where you can get to know some things about me. There's also a section for projects I've worked on.
