jQuery

Styled Components

Git

Bootstrap

Netlify

SKILLS

- Excellent written and verbal communication.
- Well rounded debugging skills with IDE and DEVtools.
- A good understanding of UI/UX best practices.

Word Beater– *JSON, JAVASCRIPT, BOOTSTRAP, HTML*

Word Beater is a speed typing web app created using various languages. I made use of javascript more in this project. I basically pulled several words from a local array of text and projected them onto the UI, I also added a timer that indicates how long you have to type in any particular word.

Portfolio Website– *JAVASCRIPT, BOOTSTRAP, HTML, CSS, GIT, SCSS*

This is my personal portfolio website that showcases my skills, how you can contact me, and also an about me section where you can get to know some things about me. There's also a section for projects I've worked on.
